

Helping our Customers is Child's Play

We are a company of individuals who still value relationships with customers regardless of project size. If it's important to you, it's important to us. We want your experience with us to be something worthy of your recommendation.

Our management staff has over 36 years of combined playground experience. From helping select the pieces that are right for your preference, location and budget all the way to the time of installation, KORKAT will be with you as a competent advisor and trusted partner.

From grading to set up and even future service of your playground equipment, KORKAT doesn't disappear after the sale. Our team has all the necessary licensing and playground safety certification to maintain your equipment whenever you need it.

In short, it is a turnkey operation – KORKAT style.

Founded in 2003, KORKAT's success is reflected in three primary commitments:

- To provide remarkable customer service.
- To be a reliable and accurate consultant on any playground endeavor you undertake.
- To offer the highest safety standards in the industry.

PLAYGROUNDS & SITE AMENITIES

Water Play – One Fluid Motion

Sure, it's all about the fun. However, when it comes to playing in and around water, we believe that the activities should be designed to subtly challenge children while they're having fun. Our extensive collection of water play equipment, manufactured by Water Splash, is at the top of the list in quality, while never missing a beat in creative design.

Loaded with events and activities that encourage children of all ages and abilities to develop their minds and their bodies, we have a broad selection of high-quality water play equipment designed to create a thought-provoking recreational area. These products are top quality, safe and accessible to all children. We have everything from in-ground sprays, aquapets, structural units and interactive play stations.

Waterslides – Downhill Fun

Ready to create some real buzz at playtime? Forget the standard playground slide; if you want to foster true adventure for kids and families, it's all about the waterslide. Of course, we can wow you with the fact that our slides have accurate radius and splash factor, but what you really need to know is that the right waterslide can spell big turnout and major fun for your visitors.

Far and beyond ordinary playground slides, KORKAT water slides provide more speed due to the water, which increases the No. 1 goal for kids – **the thrill!**

Commercial Playgrounds and Parts

At KORKAT, we never forget our ultimate customer – the kids. We strive to produce commercial playground equipment that is amusing, sturdy, safe and challenging for children. These playgrounds are tested to withstand anything from little toddlers to adults (all kids at heart). Our playground tools inspire an array of energetic, inventive, and supportive play. Best of all, we will help you generate an entirely personalized playground plan that is uniquely yours.

Indoor Playgrounds and Parts – No One Rains on this Parade!

No longer does a rainy or snowy day mean the kids cannot live out their superhero adventures.

Rain or shine, an indoor playground never hampers the fun.

We will help you create your own design with KORKAT's large part selection. A custom design is limited only by your imagination, as the options for contained playgrounds are endless.

Sports Equipment – For Bodies in Motion

Imagination is such an important part of kids' development – and adults too! Whether the dream consists of making fantastic hoop shots or amazing gymnastic feats, KORKAT's sports equipment helps nurture that imagination. And who knows, with the proper sport equipment it's one step closer we come in helping clients pursue their dreams.

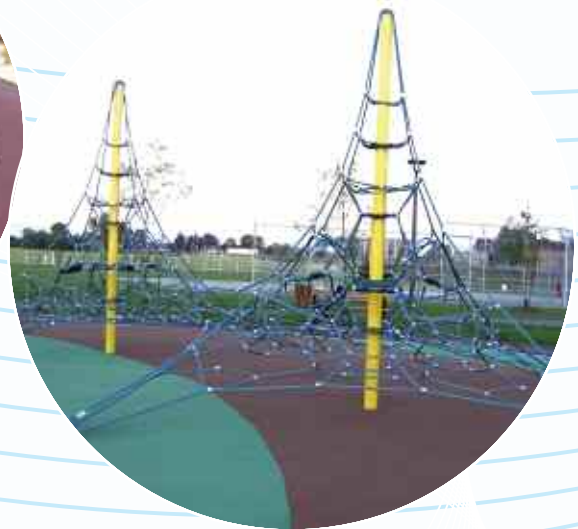

We supply a variety of equipment for the accomplished competitor or the budding athlete.

Rotational Games and Climbing Structures

From cutting-edge playground games complete with forward-looking rope structures, climbing boulders, rotating climbers and the world famous Biggo Swing™ we have revolutionized the playground industry. These unique playground games produced by Dynamo Industries combine the fun of climbing with the thrill of motion.

The games incorporate motor skill development, balance, exercise and group play while exceeding industry standards in play value and playground safety. No playground is complete without KORKAT's Dynamo Industries structures.

Made in the Shade

Sail Shades – Playing can be hard work, especially in warm weather. When it's time to take to the shade, KORKAT's sail shade canopies are the solution. We can custom design shade canopies to fit almost any situation or odd shaped location.

Shade canopies can also put the visual finishing touch on any park, playground or project. And our designs will conform to your post location restrictions.

The advantages of sail shades are unique in that our fabrics come in an array of fun colors. In addition, our products are built to withstand the changing seasons.

Traditional Shades – KORKAT's traditional shades offer a wide variety of sizes, heights, colors and fabrics – all of which can be coordinated to meet individual requirements. And whenever a harsh storm requires temporary removal of the canopies, our quick release fasteners make it easy with just a few turns of a wrench.

Like the sail shades, the fabrics for the traditional shades come in a wide variety of colors.

All of our shades provide up to 99% protection from dangerous ultraviolet radiation.

Site Amenities – Let's Sit a Spell

What fun is it to play without someone to sit and watch? KORKAT's tables and benches are engineered tough to withstand long-term use in the outdoors. They are state-of-the-art design and some of the most luxurious outdoor fixtures accessible anywhere. Sturdy but attractive, we also offer shelter combos, receptacles and bike racks.

Metal Shelters – Take Cover

No play area is complete without a recreational shelter or pavilion. It's practical, functional and adds great benefit to any playground, park or outdoor project. Litchfield manufactures our pre-engineered recreational shelters and kiosks.

These shelters dramatically reduce maintenance costs, are easily installed and can be designed for severe conditions.

Consider that the installation of a pre-engineered shelter can reduce maintenance costs and eliminate the need for multiple re-painting jobs over a standard pavilion type of structure.

The shelters are painted in a factory-controlled environment to ensure a quality appearance. They come standard with an anti-graffiti powder coat paint.

However, in the event graffiti hits you, clean-up is easy with our special graffiti cleaner.

KORKAT shelters are manufactured from premium quality components including extruded (not rolled) fascia and ridge caps that insure straight-uniform lines, Galvalume steel roof panels with a 20.5 year warranty against rust; and stainless or galvanized fasteners that eliminate stains. We even manufacture our own roof panels!

Structural pans eliminate many unsightly roof purlins while increasing roof strength and our snap together design assures water tight, all weather seams.

If needed, we can even replace individual panels.

Skate Parks Enter the 21st Century

While once practiced by only a few, today skateboarding has exploded into one of the most popular recreational activities for children, teens and families.

State parks are the ideal community destinations for skateboarding. At KORKAT, our promise is simple: we will help you to build a top quality recreational area within your park that will be a tremendous addition for your community.

We utilize an array of professional skaters and industry experts to ensure optimum safety, fun, durability, expandability, and aesthetic appeal.

Each component is designed to work in tandem, allowing simple layout adjustments for optimum flow. Our modular approach means total flexibility for updates and additions. Our sample layouts are designed for small, medium and large skate areas, each with its own dynamic lines.

Exercise Equipment – When Playing Gets Serious

From living longer to looking better, a growing number of parks and recreational areas are meeting the demand for the availability of safe, easy to use exercise equipment.

At KORKAT we have a complete line of products that offer a variety of exercises in balance, flexibility, cardio and strength training.

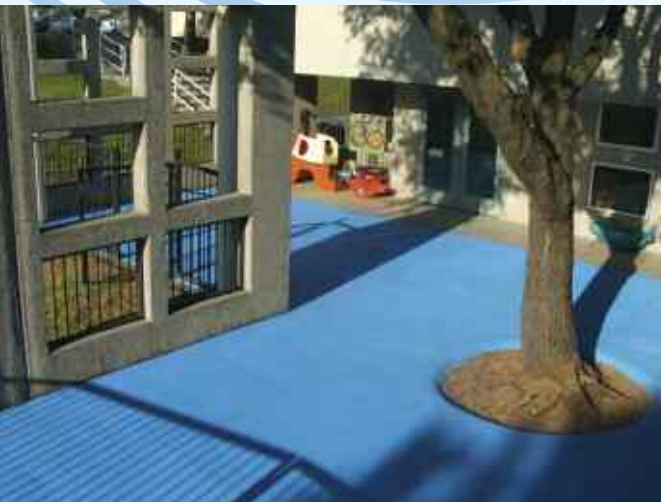

Our products are engineered to be easy to understand while maximizing core workout goals.

Our Dog Parks Are Fetching

Your four-legged kids need exercise too. With our wide variety of playground equipment just for dogs, you can transform an empty field or meadow into a unique play space that engages a dog's mind and body.

Dog parks give your furry friends places of their own to socialize and exercise safely in the way they love best – off-leash.

Pour-in-Place Surfacing – Grounded in Safety

It's no secret that you get what you pay for, and when it comes to addressing the fall zones of children's playgrounds, safety should be the primary goal.

The sturdiness of Pour-in-Place is grounded in the fact that – while the financial outlay is initially greater – the long-term cost is 70 percent less than wood mulch over a 20-year period. That's because it's six times heavier than wood mulch. In short, you can install it and forget about it.

Rubber Mulch – A Fun & Safe Alternative

When kids are climbing and hanging all over playground equipment they're not thinking about injuries. With loose fill rubber mulch, you won't have to think about it either.

Our rubber surface loose fill makes outdoor playground equipment safer and more fun than ever! Because 79% of playground injuries are due to falls on hard surfaces, outdoor playground equipment is only as safe as the surface that's under it. Consider our recycled rubber surface for your outdoor playground equipment, instead of hard surfaces such as mulch or turf.

In addition to making the playground safe, it's also cost-effective. Because it is a loose-fill material, it's easy to install and more economical than poured-in-place or mat rubber surfaces. Traditional surfaces, such as mulch, sand, or pea gravel need to be added to or replaced every year. With rubber surfaces, less than five percent need an annual replacement.

Shane Lanier, Founder

It's obvious that Shane Lanier loves to see kids having fun. As if his long-standing career in the design and selling of playground equipment were not enough of a testimony to the fact, the KORKAT name was actually inspired by his daughters, Korin and Katie.
