Tough & Durable

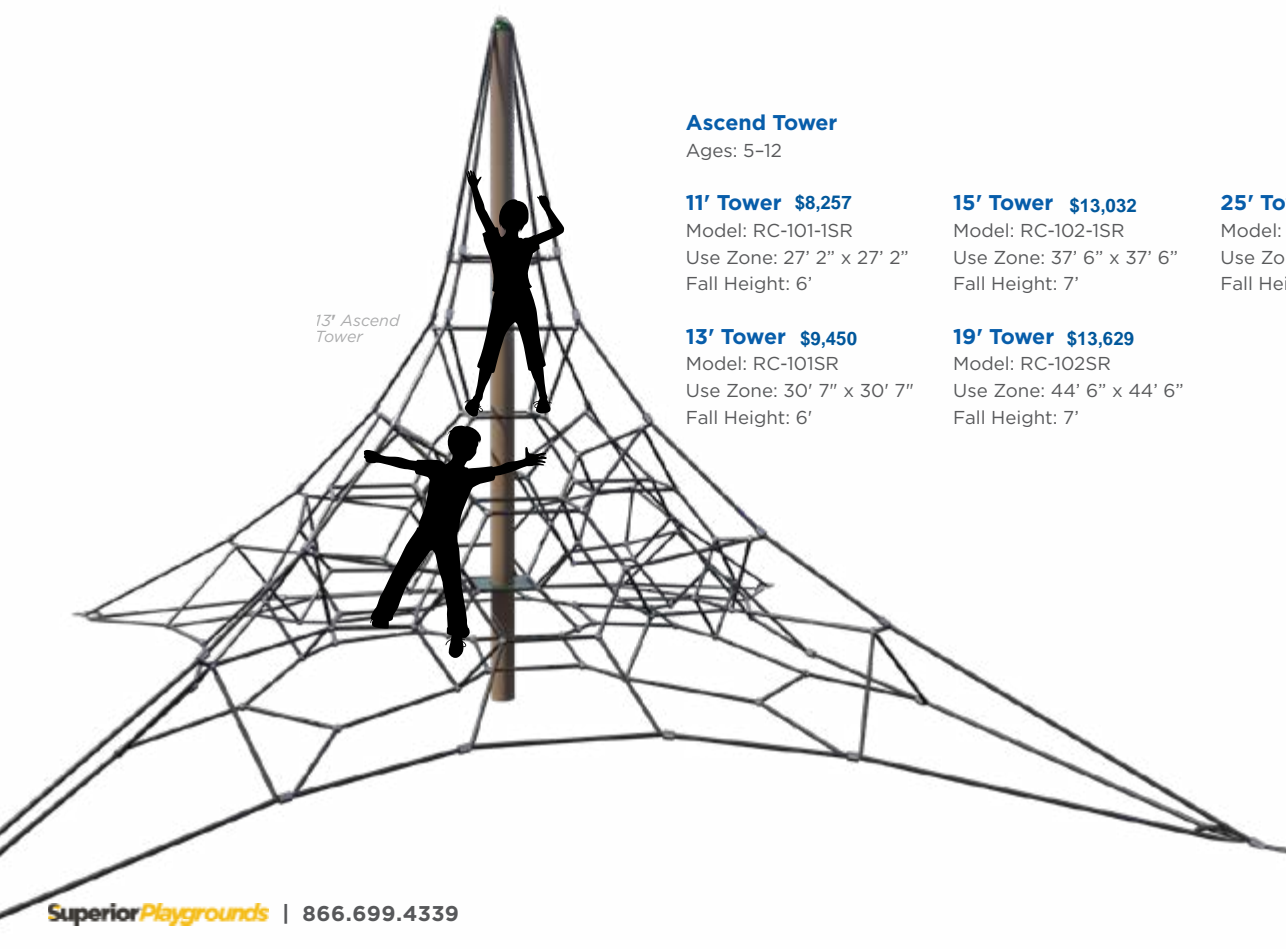

Our climbers feature some of the toughest and most durable cabling — a whole 20mm in diameter to be exact. Our rope is made from six galvanized steel reinforcing cables weaved around a core to create a rope unlike any other.

Soft to the Touch

We add a nylon cable coating and UV protectants to ensure they're resistant to fading, wearing, and fraying. What's left is a durable and strong rope that's soft to the touch.

Variety

Choose from three climbing options: freestanding net climbers, designs that allow you to integrate the design directly into your play structure, or whole net play systems.
