Play, relax, live.

For nearly three decades, Superior Recreational Products has been cultivating communities, enriching lives, and allowing people to focus on what matters most. With our extensive collection of outdoor and indoor play lines, we are committed to enriching the lives of children at schools like yours. SRP playgrounds have a critical role in engaging social and emotional development as well as physical benefits.

We give children an opportunity to let their imaginations soar on the playground. We shade families relaxing on benches at the park. We host group picnics on Sundays. Together, we can create spaces where friendships are made and memories are created. It's time to come *play, relax, live.*

Get a glimpse into our product lines and see why Superior Recreational Products is a great resource for your educational facility's recreational needs.

Crane Elementary School Crane, Texas

Chaparral Elementary School Deming, New Mexico

PLAY, LLC.

ADA Accessible Structure: With a student population of over 500 children, only one small modular playground and a climbing wall wasn't enough for Chaparral Elementary School. The solution was a large multi-level structure with lots of slides with a separate more active structure for older kids. It is the largest SRP playground installed in New Mexico to date. This structure features a large ground-level playground as well as ramps and sidewalks that provide excellent ADA access.

Let's relearn recess. It's as easy as 1-2-3.

Not only does recess have great physical benefits for children, it encourages social and emotional development and results in a more productive classroom.

1 2 3

COGNITIVE & ACADEMIC

Children perform better in the classroom when they are able to play in an unstructured social environment. Research shows that children have optimal cognitive ability when they're able to take a break from the classroom.

1 2 3

SOCIAL & EMOTIONAL

Recess offers children time to engage and interact with each other. These interactions help children develop social and emotional skills. Research shows that children learn valuable communication skills, including negotiation, cooperation, sharing and problem solving.

1 2 3

PHYSICAL

There is a wealth of opportunities for children to be active during recess. Even though not all children play vigorously, children are able to choose their activities and play for the joy of it. Even minor movement helps children lower their risk of obesity and improves their quality of health.

Information acquired from the American Academy of Pediatrics.

- Utility Locations
- Restoration after Construction

20%–90% Surfacing

- Type of Surfacing
- Size & Layout
- Thickness of Surfacing
- Preparation Needed

Crane Elementary School Crane, Texas
PLAYGROUNDS, ETC.

A Repeat Customer: As a previous SRP customer, Crane Elementary School knew just what they wanted in a new playground. Planners wanted to get the most bang out of their available space, so our designers created the biggest playground that would fit within their space. With their school colors shining bright, this playground offers children an environment where their imaginations can soar.

Check out more playground projects on our website.

PHASE ONE
Capacity: 36
Size: 38' x 15'

PHASE TWO
Total Capacity: 68
Phase 1 + 2 Size: 38' x 26'

ALL PHASES
Capacity: 82
Size: 38' x 35'

PHASE THREE
Total Capacity: 82
Phase 1 + 2 + 3 Size: 38' x 35'

Why is phasing beneficial to schools like yours?

With phasing, a small segment of your playground is installed at a time allowing schools who have limited funds to satisfy their immediate play needs while keeping their larger playground goals well within reach. Structures can be developed in as many phases as needed to accommodate your budget.
